DriverPass System Analysis

Brendan Richardson

System Requirements

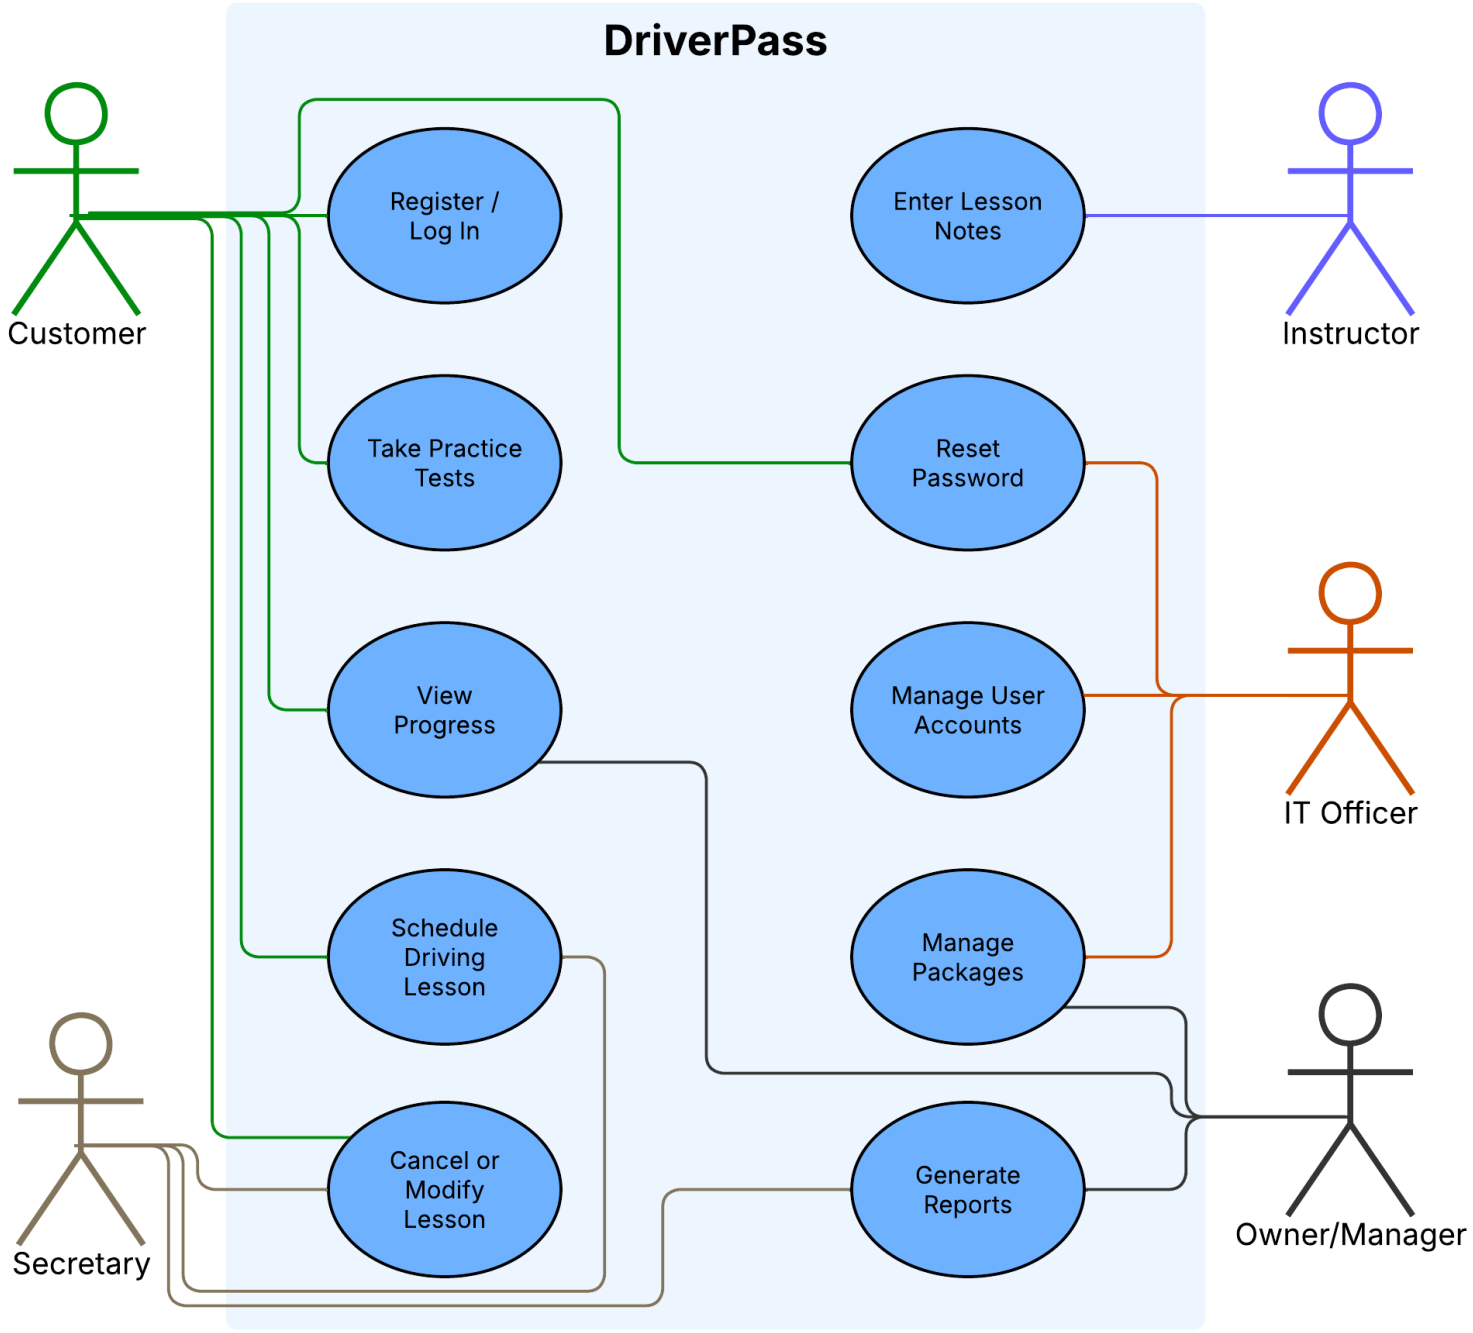
Functional Requirements

- Customers can schedule, change, and cancel driving lessons online.
- Customers can take practice tests and see their results and progress.

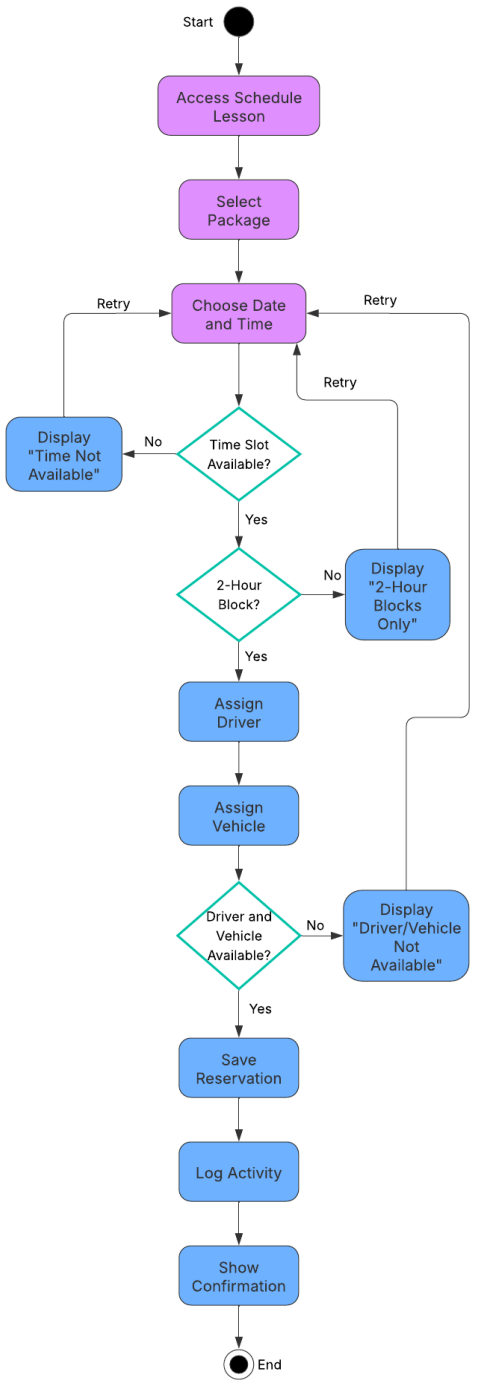
Nonfunctional Requirements

- Web based and mobile friendly so students can use it anywhere.
- Secure login with role based access.

Use Case Diagram



Activity Diagram



Security

- Secure login required for all users.
- Different access for students, staff and admin.
- Password reset support for customers and admin controlled resets for staff.
- Activity history for key actions like creating or changing reservations.

System Limitations

- The first release focuses on web access, a dedicated mobile app is not included.
- Keeping practice tests up to date depends on receiving DMV updates in a usable format.
- Advanced package customization can be added later if DriverPass expands offerings.
